

# A&W Design-Build Team

11400 South TIE Committee

Wednesday, July 8, 2009

- Photos & schedule
  - Include new schedule map
  - **Include upcoming concrete placing**
  - **Road closures**
    - check on notification (?)
    - delay at 500 West

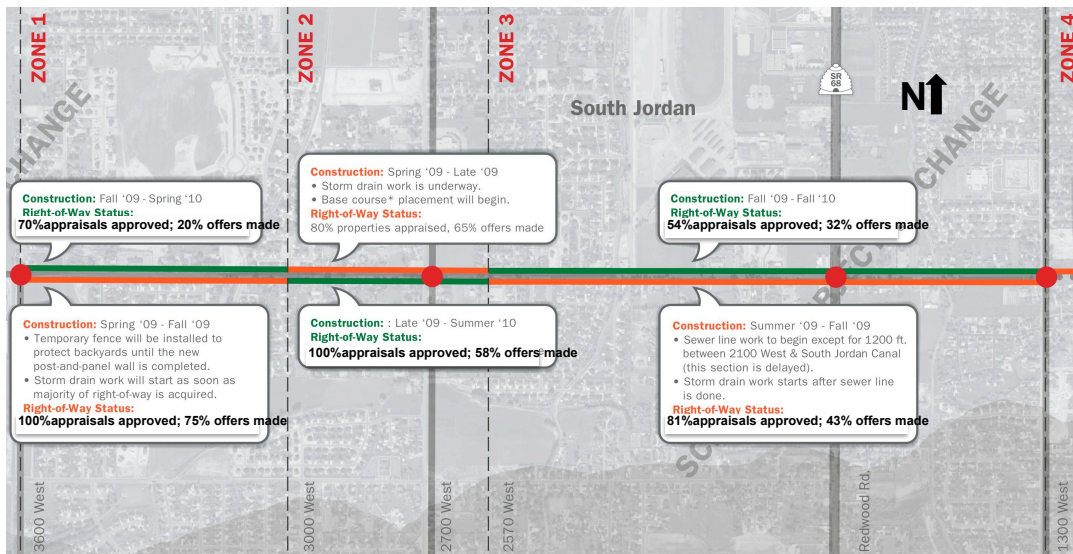

# Construction Update: Concrete

UPOT

# Construction Update: 3600-1300 West

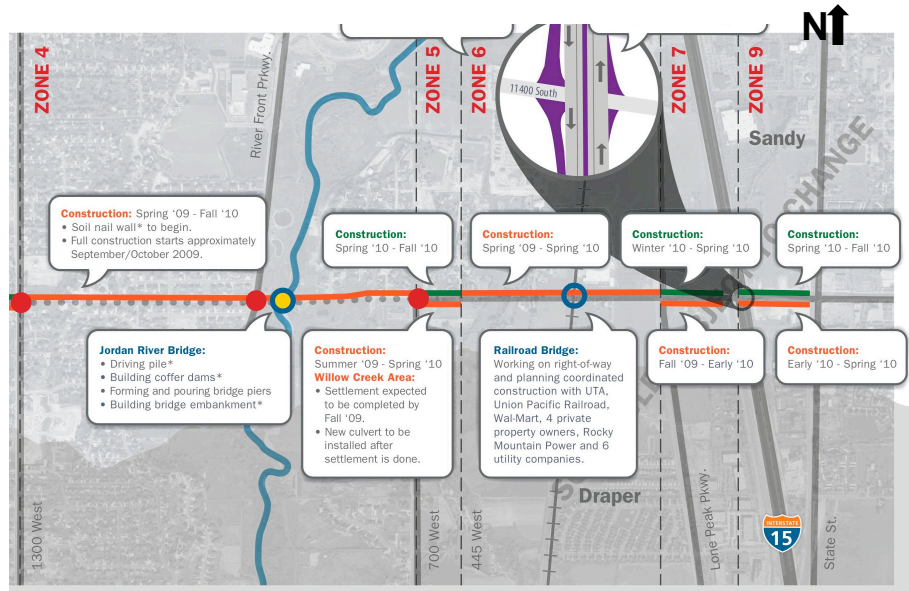

# Construction Update: 1300 West-State Street

UPOT

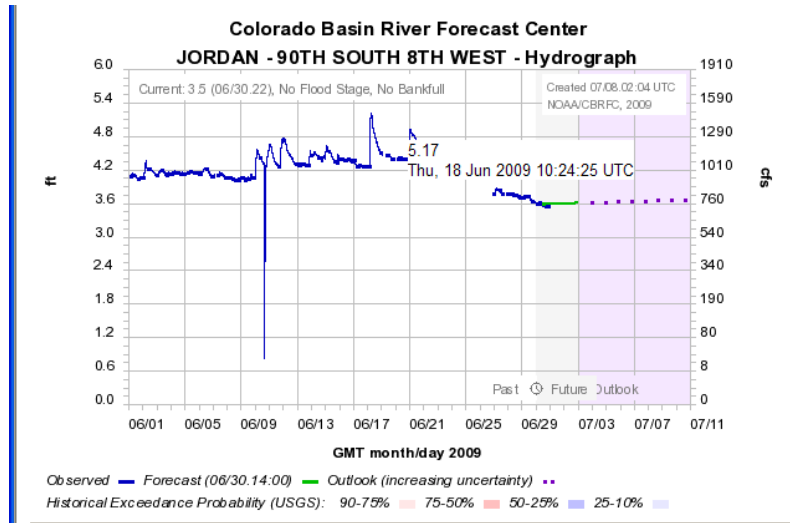

Willow Creek Backs up at 11400  
South

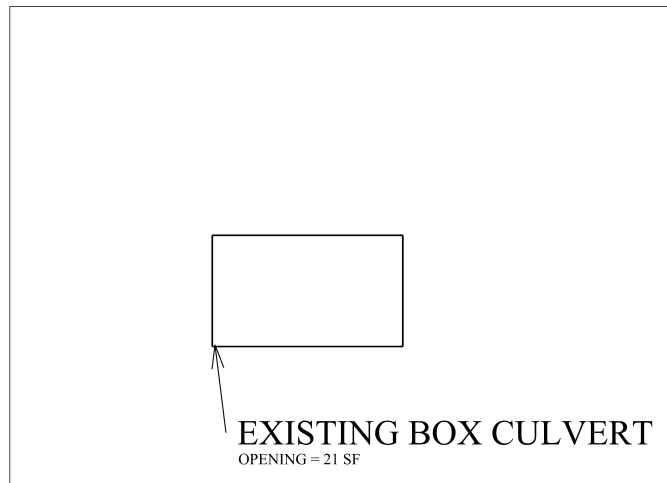

## Pre-Construction Condition

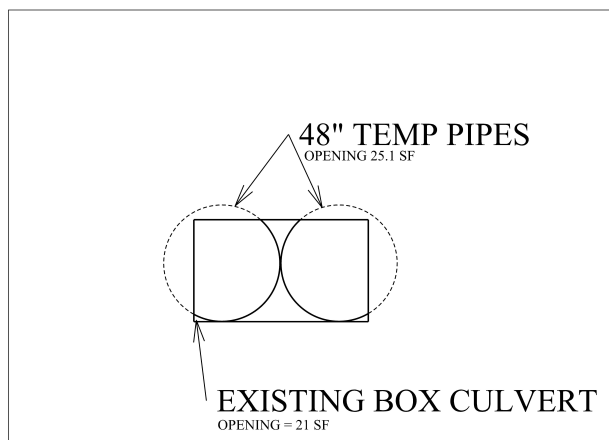

- Existing box is 6.0 feet wide by 3.5 feet tall

UPOT

## During Construction

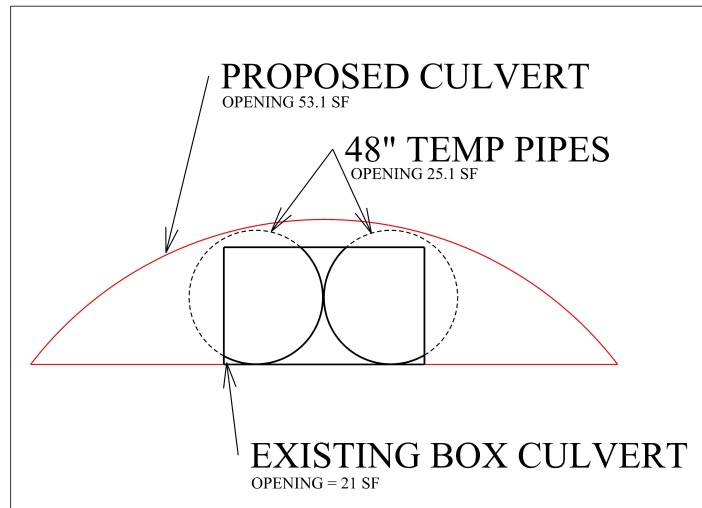

- Coordinated with Salt Lake County resulting in two 48-inch pipes

UPOT

- 20-foot wide arch culvert

# Construction Update: Road Closures

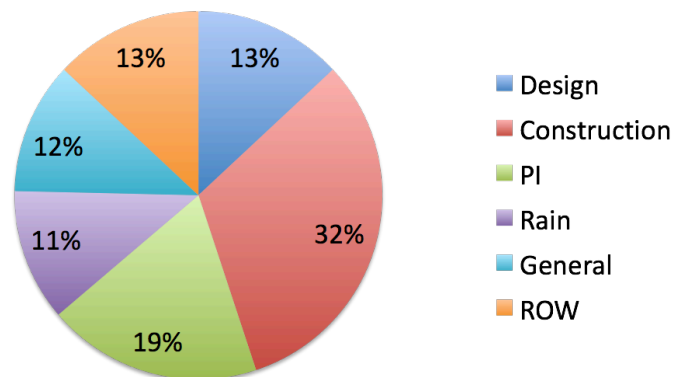

Joe Warnick, Ames Construction  
11400 South MOT Manager

- Access / Closures
- Traffic Maintenance
- Safety
- Mobilization

# Public Involvement Update

June Email & Phone Contacts

Q: “Can we put something like ivy on walls that just retain and have nothing good looking on them?”

Response: Ivy on the walls creates structural issues and maintenance issues long term.

Q: Multiple comments about the locations of trees in relation to driveways

Response: The trees will be adjusted to provide for the clear zone.

Q: "Why shrubs" – at the equestrian park

Response: There is a retaining wall through part of this property thus causing a structural conflict. Shrubs were chosen as an alternate to provide an enhanced landscape at this location.

*UPOT*

Q: Consider shrub heights in front of walls.  
No need to install a wall that cannot be viewed

Response: Taller shrubs moved to sides on all quadrants to gain walls views.

*UPOT*

## Landscape Comment Review

Q: “Just looking at the main plan it looks like the trees are planted ON a canal. Is this something that is normal or when planting time comes it will be re-adjusted?”

Response: Due to structural concerns, no trees will be located on the canals. Trees will be adjusted.
